Battery Replacement
Made Easy

YU-FIT Configurator Battery Replacement Made Easy

Replacing the battery on a modern vehicle is no longer a straightforward fit-and-forget task. With the introduction of new CO₂ production control systems such as smart charging and Idle Start Stop (ISS) it is essential that the vehicle has the correct battery type installed.

An increasing number of automotive manufacturers have introduced systems that now require a replacement battery to be correctly configured to the vehicle after installation.

Failure to configure the correct specification battery could result in:

- Undercharging or overcharging of the battery resulting in damage which is not covered by the manufacturer's warranty
- Loss of the ISS CO₂ production control system functionality
- Possible loss of non-critical vehicle system functions

Battery configuration prevents incorrect battery charging, ensures the correct operation of the ISS CO₂ production control system and prevents the loss of non-critical vehicle systems.

The Yuasa YU-FIT battery configurator tool allows the configuration process to be carried out on a growing number of vehicles equipped with new technology smart charge and ISS systems.

The configuration process therefore:

- Informs the vehicle that a new battery has been installed
- Informs the charging system of the new battery characteristics
- Ensures the vehicle uses the correct charging parameters for the new battery

Simple step by step operational functionality

Simply plug the YU-FIT into the EOBD port and perform a battery configuration in just a few easy to follow steps. Typically it takes under 60 seconds on most vehicles.

Why choose a Yuasa YU-FIT?

The Yuasa YU-FIT is an aftermarket battery configuration tool that provides a cost effective, easy to use solution.

The YU-FIT battery configurator provides a complete battery replacement solution for vehicles that require battery and energy management system configuration.

The YU-FIT will reduce battery replacement costs and customer inconvenience, while enhancing the services provided by aftermarket battery suppliers.

- ☑ Easy to use, with simple walk-through six button operation
- ☑ High build quality to ensure durability and long service life
- ☑ Quick and easy battery configuration. Average completion time is under 60 seconds
- ☑ Regular easy to install software updates, providing end users with up-to date coverage*
- ☑ Unit operates directly from the vehicles EOBD port, no batteries required
- ☑ Full 12 month warranty from purchase date
- ☑ First 12 months battery validation subscription included with purchase price**

* Requires internet connection and USB data cable. ** Annual fee applies after this time.
